Laboratory Robotics Interest Group of Philadelphia (LRIG)

Our Mission

The LRIG mission is to provide and facilitate instruction for both Self-development and the benefit of the laboratory automation community. To do this, we:

- Provide physical and virtual meeting places for scientists, engineers and academics interested in furthering their careers and the field of laboratory automation.
- Facilitate communication among users and providers of laboratory automation.
- Provide a platform to encourage an open discussion of any new automation technologies that can be beneficial to the laboratory automation community.
- Share current best practices and experiences in the design and implementation of laboratory automation.
- Encourage members to actively contribute, via the use of web and e-mail based bulletin boards (Discussion Mailing Lists).
- Evaluate new technologies / instruments and share our findings at regional meetings and with on-line presentations archive.
